## DETAILED ACTION

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 2, 4-7, 9-12, 14, 15, 17 and 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lineberger (5,219,413). Lineberger discloses a method for reducing vehicle idle time, comprising the steps of: detecting whether there is an occupant in the vehicle; disabling a timer that generates a signal to shut off an engine of the vehicle if an occupant is detected in the vehicle; Lineberger does not disclose enabling and disabling the timer. However, the feature of resetting the timer is necessary to allow engine restart. Therefore, it would have been obvious to one of ordinary skill in the art at the time of the invention to include a resetting feature for the timer to allow the driver to restart the engine safely.

Regarding claim 2, enabling the timer as explained above.

Regarding claim 4, see claim 1 above.

Regarding claim 5, a second indicator.

Regarding claim 6, wherein the controller further enables the timer module responsive to the second indicator if the timer module is disabled.

Regarding claims 7, 12 and 15, wherein the override circuitry further comprises at least one of a infrared device ....., motion detector (15).

Regarding claim 9, see claim 1 above.

Regarding claims 10 and 17, wherein the override circuitry further provides a second indicator that the vehicle is unoccupied.

Regarding claims 11 and 18, wherein the controller further enables the timer module responsive to the second indicator if the timer module is disabled.

Regarding claim 14, see claim 1 above.

### ***Response to Arguments***

Applicant's arguments with respect to claims 1, 2, 4-7, 9-12, 14, 15, 17 and 18 have been considered but are moot in view of the new ground(s) of rejection.

### ***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the

Art Unit: 3747

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
